DETAILED ACTION

Claim Objections

1. Claim 1 is objected to because of the following informalities: the 8th line includes the text "...signal processor of applies..." The use of the word "of" is awkward and the examiner recommends deleting it.. Appropriate correction is required.
2. Claim 5 is objected to because of the following informalities: the 1st line includes the text "...eight..." The examiner believes this is a typo and that the applicant intended the word to read "weight". Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
4. Claim 1 recites the limitation "the first communication device" in the second to last line of the claim. There is insufficient antecedent basis for this limitation in the claim.

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164

Art Unit: 2682

USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-17 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 10-14, 16, 78 and 79 of U.S. Patent No. 6,687,492 B1. Although the conflicting claims are not identical, they are not patentably distinct from each. The subject matter of claims 1-17 of the application are contained in claims 10-14, 16, 78 and 79 of U.S. Patent No. 6,687,492 B1. However, the subject matter is arraigned such that the claims of the application contain less than the entirety of the claims of the patent for any given claim. The following table correlates the subject matter contained in the claims of the application to the subject matter's location in the patent:

<u>Application claim number</u>	<u>Location of subject matter in patent</u>
1	78 (part a)
2	78 (part b)
3	79
4	14
5	11
6	12
7	13

8	78 (part a)
9	78 (part b)
10	78 (part b)
11	10 (part a)
12	10 (part b)
13	16
14	14
15	11
16	12
17	13

The omission of an element and its function in combination is an obvious expedient if the remaining elements perform the same functions as before. *In re Karlson*, 136 USPQ 184 (CCPA 1963). Therefore, the claims of the application are obvious over the claims of the patent. It is noted that independent claims 1, 8 and 11 of the application comprise the subject matter that was indicated allowable for claims 10 and 78 of the patent.
